KOMENTAR TEKMOVALCEV:

S52LY: Žal, rezultat ni zadovoljiv, saj sem moral delati s sposojeno postajo, ker svoje še nisem dobil. Velika razlika proti lansnemu letu, hitra kratka odpiranja z različnih smeri, višina igrala pomembno vlogo... zelo močne motnje mi je povzročal S56Y (12km) in malo manj S51CK (91km), čeprav sem imel v krogu še S53N (10km) in S57AJ (5km) katera pa se skoraj ni slišalo in vsi so verjetno uporabljali enako moč - 50W do 100W! Škoda ker je samo eno tako tekmovanje, tako se slišimo zopet naslednje leto... mejte se lepo!

S53N: Thanks to the first operator Marijan - S56A we improved last year score. But the success would not come without three man: Florijan - S57EFL, Rado - S52SR and youngman Andraž - S59AM, who is almost 16. They erected the antenna with plastic (?) rotator and set the station. Brand new lap - top with S52AA program vhfctest4.win was Vili - S51XO contribution. Propagation just before contest was very promising, because we heard clearly and loudly some east coast USA stations, but they couldn't hear us. Anyway, during the contest, contacts with USA were also

not possible. At least Canaric islands was made thanks to double F2 hop (?) at 3273 km ODX . 51 contacts with Great Britain and several distant west and east Europe stations were made, many of them in CW.

During the night there was no propagation between approximately 23.00 UTC Saturday evening and 06.00 UTC Sunday morning.

IC 746 PRO was working just OK, but in the next contest antenna has to be erected at least 2 m higher.

On Sunday we were acting also in S5 maraton between 07.00 and 12.00 UTC on 50/144/432 MHz and Alpe Adria contest 432/1296 MHz from 07.00 to 15.00 UTC. Alltogether we set 4 stations - enough enjoyment for all 6 operators.

We are very satisfied, specially our "Benjamin" Andraž - S59AM, who made his first contacts in magic band ! 73 from S53N contest team !

Comments by Vili - S51XO
